EXPERIENCE

Juniper Behavioral Health - Senior Software Engineer 2023-2024

Better, automated insurance billing for SMBs in the behavioral health space.

Python, Typescript, React, Postgres, Redis, RabbitMQ, AWS Cloud, Github CI/CD, Docker

- Developed a modular intake system for the myriad electronic health record providers used by clinics.
- Built data cleaning and integrity checking system to automatically ensure incoming EHR data was usable and correct for insurance billing.

Waysync - Founding Software Engineer 2022-2023

Shipping rate management for Freight Forwarders

Ruby on Rails, Typescript, Python, AWS Cloud, Github CI/CD DevOps, Docker

- Automated tedious rate-finding tasks through structuring unstructured excel and PDF documents with validation for all incoming data.
- Developed a user-friendly rate selection tool to be used by freight forwarders or in some cases their clients directly.
- Introduced and maintained AWS Cloud deployment and Github DevOps for all services.

Better Mortgage - Senior Software Engineer 2020 - 2022

Online-first mortgage lending

Python, Typescript, React, FastAPI, Postgres, Redis, Kubernetes, Electron, AWS, Github CI/CD

- Built and maintained predictive dialing for outbound sales calls used by tens of thousands of agents simultaneously.
- Shipped and maintained VOIP software to thousands of agents to be used as their primary means of dialing.
- Formulated and facilitated productivity experiments.

Infegy - Software Engineer 2015 - 2020

Social media listening for data driven advertising agencies

Python, Typescript, C++, PyTorch, MySQL, Elasticsearch, Jenkins CI/CD, Baremetal Infrastructure

- Built tooling for crawling, analysing, storing, and indexing data from hundreds of thousands of sources daily.
- Built tooling for our outbound B2C sales team to identify and reach new opportunities.
- Introduced and set up DevOps CI/CD through Jenkins on to in-house application servers.
